

What is Itchy Skin Keeping You From?

EXPLORE A CLINICAL RESEARCH OPTION
FOR ATOPIC DERMATITIS SYMPTOMS.

A clinical research study is currently evaluating the effects of two different investigational drugs to find out which is better for treating Atopic Dermatitis in adults who are also receiving medicated and non-medicated skin therapy.

You may be eligible to participate if you:

- ✔ Are 18 years of age or older
- ✔ Have been diagnosed with moderate to severe atopic dermatitis for at least 1 year
- ✔ Are getting inadequate results with your current treatment for atopic dermatitis
